NOTE: This special blank is not a cut key. It is to be used the same as regular blanks for duplicating, cutting from code or from depth keys. It will save the locksmith 80% of his work, and the key can be cut more accurately and in less time. After cutting the special blank, when compared with the original keys, they will not be exactly alike in the pass cut positions, but this is not important as long as they match with the original where the tumblers rest on the key.

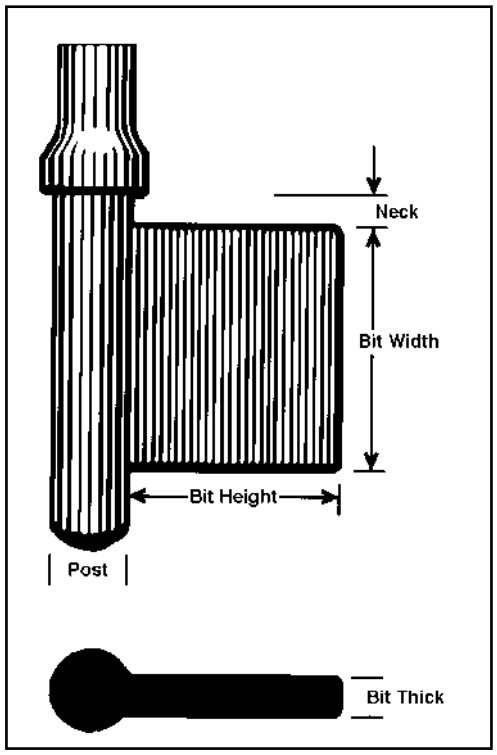
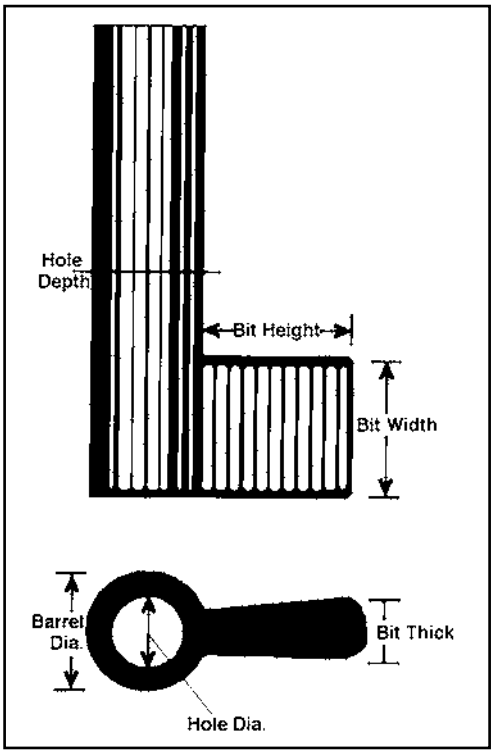
BIT AND BARREL

Keys are separated by type - bit or barrel and are in number sequence.

DETERMINING SPECIFICATIONS ON BIT KEYS



Dimensions of a Bit Key



Dimensions of a Barrel Key

The following pages show our selection of Bit and Barrel Key Blanks. This page will help you identify the key blank you are looking for.

- The chart below lists various types of material used in Bit and Barrel key blanks.
- Measurements below each key drawing are shown in hundredths of an inch and tenths of a millimeter. Please understand that these styles of key blanks are not made to the same tolerances of cylinder key same tolerances of cylinder key blanks by the nature of the processes utilized. If the dimensions are close they will more than likely work.

Diagrams (left) show how the bit and barrel keys are measured so you can understand what to measure for comparison.

Materials Used

MI	-	malleable iron
Steel/Plastic	-	a nickel plated steel shaft with a plastic tip.
Steel/Zinc	-	a nickel plated steel shaft with a die cast zinc tip

SECTION 8B
MERCHANDISING AIDS

This section describes available ways to merchandise Ilco® key blanks.

Decorated (Painted) Keys

Your consumer's eyes are sure to be drawn to this line of keys. Whether they are choosing a fun way to express their individual style or a functional way to differentiate one key from another, this popular category offers an ever changing variety of designs, patterns, and officially licensed key blanks. ***See our web site for the latest designs.***

Our patented decorating process allows for intricate, detailed designs as well as a specific and precise color match. This specialized process also provides Ilco brand decorated keys with a durable, scratch and chip resistant finish.

Personalized Keys

These keys are made to help you to promote your business and assure repeat business. Ilco offers you a wide variety of keyways and bow (head) styles for your personalized information. Two types of personalization are available: state-of-the-art laster engraving or a high quality embossed customer logo and/or other information. You can also choose from original manufacturers bow shapes, the neuter/security bow, or from several custom shapes.

Neuter Bow Keys

Security Head keys h ave a common or "neuter" bow and may be incised with "DO NOT DUPLICATE". The common bow does not have an identifying number which helps to deter unauthorized duplication. The back of the key is blank and may be imprinted with your specific information, room numbers, etc, The most popular residential and commercial keyways are available in this line of keys.

Large Bow Keys

Large bow keys (also known as hotel keys) offer your customers another option to meet their requirements. This line is made from nickel silver stock to provide greater torque strength providing more resistance to twisting and breakage. Keys feature a "blank" area for stamping. This line may also be coined to your specification by adding logos and special designs.

Color Plastic Head Keys

Color plastic head keys offer your customers another solution for visual identification.

Ilco offers two styles for you to choose from: Cool Colors are a line of "soft-gel", transparent color plastic head keys. Solid Color Plastic Head include an opaque color plastic that is framed in metal.

Key Center

The modular Key Cutting Center allows you to maximize profits per square foot. From a small footprint, you have the flexibility to guild from a smaller, single tier tower to the large double tower with the most popular of both residential and commercial key blanks.

Add Key Tower accessories that fit your requirements. Accessories include a 4-wheel cart with built in shelfing, to garage side racks for “niche”keys, to a garage with shelf for additional equipment of storage.

Displays

For merchandising, choose from rotating racks, carded racks or flat panel display. Our selection of displays range from small “free-standing” to large “wall-mounted”. These are perfect for consolidating consumer favorites such as painted keys.

A specialized grouping of painted keys can be featured on a small acrylic display. This display with insert is included with many of our assortments or you can order the plain display and develop you own insert for localized, personal promotions.

Displays are updated to meet changing requirements. ***Check with your distributor for current offerings.***
